origami paper/newspaper

Hi! I'm Carly, I am a junior at GHS. I make origami in a lot of my classes as a way to get myself to focus and calm my anxiety. When the Spring musical was in auditions I had jokingly suggested to one of my friends "oh what if I made some of the flowers out of origami" and they really liked that idea and encouraged me to ask Mrs. Mulqueen. She loved the idea and I have enjoyed making origami flowers a lot since!

I found my love and passion for creating pottery, specifically using the pottery wheel and making different sized cups, bowls, and mugs, in Ceramics class at the Guilford High School. After the first time I used the pottery wheel, I instantly knew I had found a new hobby of mine that I want to do for a lifetime. I create ceramic art because it truly is a way to relax and relieve stress, and I find each time I use the pottery wheel that my skills become stronger. No matter what I create, I

always try something different, and learn something new everyday.

Accidental Father

Procreate

Hi, my name is Janelle Wilkinson. I love to draw traditionally and digitally. I started to create art from a young age to escape into my own reality in which I know I can be in control over what happens. I get inspired by other artists/pieces of work but most of the time, I get inspired by people I see in everyday life because they always stand out to me. This first submission was drawn on a whim because of a funny video I saw of this person saying they look like a priest after they bought a choker and thought hey that would be awesome to draw and I did it. I showed it to them and they loved it. The second was based on the painting, At the Edge of the Brook by William-Adolphe Bouguereau in which I used two characters from a show called Hunter x Hunter whose names were Killua and Alluka. I felt like they fit the vibe of this painting and this piece is one of the digital art pieces that I

am most proud of because I drew it without a sketch and just went in with colors immediately (if you understand haha).
